

New web server

As some of you may already know, some thieves broke into an office of MPLA and stole our old server! We are now back online using a new server. A lot of upgrades took place, and some bugs are probably lurking here and there. If you notice anything malfunctioning, please notify the webmaster about it. Some data might also be missing; in case you can think of something that used to be accessible but it is not so anymore, please contact the secretariat and let her know about it. ([Contact details.](#))

IMPORTANT: For security reasons, all passwords have been deleted. In order to log in to your account you will need to [reset your password](#).
