

ACAC 15

10th Athens Colloquium in Algorithms and Complexity, August 20-21, NTUA

ACAC is an annual meeting in Athens aiming to bring together researchers working in all areas of the theory of algorithms and computational complexity. It serves as a lively forum for presenting research results that are in a preliminary stage or have been recently accepted / presented in some major conference. Contributions may appear, fully or partially, in informal electronic proceedings available only to the participants (subject to authors' approval). The language of the workshop is English.

There are no registration fees. However, participants should register for administrative purposes, by filling the registration form no later than 15/8, starting on Monday, 15/6.
